WBBM - 26 Sep, 2009

U.S. Congressman Mark Kirk says the only thing that will get Iran's attention is an embargo on gasoline which the country needs desperately since its refining facilities have gone to seed.

He spoke after the United States, Britain and France revealed existence of a second Iranian nuclear facility, this one underground near the city of Qum.

Kirk says flatly the purpose is to, "conceal refinement of uranium to accelerate the production of nuclear weapons in Iran."

He says Iran is the only country on the face of the Earth that's called for another country, Israel, to be wiped from the face of the Earth.

Kirk says this second site make's it clear that Iran has to be taken at it's word and stopped before words escalate to violence.

Kirk specifically wants the U.S. house to bring to the floor, his "Iran refined petroleum sanctions act." He says he has enough votes in both houses to get it passed.

He says Iran depends on imported gasoline for up to 40% of it's needs.

Kirk says while Iran is awash in crude oil, the Mullahs in charge have so neglected refinery facilities that it can't meet it's own energy requirements.
